

Case Study

SECURITY ANCHORS CARSLINGTON WATER - DERBYSHIRE

Client: Dinghy owner (private)

Main Contractor: N/A

Indemnified Design: Platipus® Anchors Limited

PROJECT SPECIFICATION

The client was obliged to demonstrate to his insurance provider that reasonable security measures were in place to protect his asset from the likelihood of opportunist theft from the Sailing Club.

SOLUTION

Two SO6 aluminium alloy anchors were installed by a hand held breaker to provide permanent security points at his berth in the Club's dinghy park. The neat and unobtrusive solution, which will also reduce the risk of damage from high winds, was quickly achieved with installation completed and tested within just one hour.

Anchor System: SO6EA aluminium alloy anchor c/w 1.2m of 6mm Ø galvanised steel wire tendon, terminating with a hard eye.

Quantity: 2 **Anchor Design Life:** 5yrs **Soil Type:** Made ground/hard standing
