

AN INTRODUCTION TO PLATIPUS EARTH ANCHORING SYSTEMS

Platipus Earth Anchoring Systems have been specifically designed to provide a fast, efficient and cost effective anchoring solution for the Civil Engineering and Construction industry.

The comprehensive range of earth anchors are driven directly into undisturbed soil/earth and offer load capacities up to 200kN. They are quick and easy to install using conventional installation equipment providing proof tested anchor points immediately.

The Platipus Earth Anchoring System requires no grout, no curing time, no mess and delivers excellent performance for applications including: -

- Bridge Repair
- Drainage Solutions
- Embankments
- Erosion Control
- Gabion Support
- Geotextiles
- Guyed Structures
- Locks & Canals
- Marine Anchorages
- Pipeline Buoyancy
- Rail Applications
- Retaining Walls
- Revetment Blocks
- Rock Stabilisation
- Scaffolding Security
- Sheet Piles
- Soil Nailing
- Temporary Structures
- Tunnel Linings
- Plus Many More...
