

# Case Study

## ARMED FORCES WAR MEMORIAL, STAFFORDSHIRE

**Client:** Armed Forces Memorial Trust  
**Landscape Architect:** Liam O'Conner Architects  
**Landscape Contractor:** [UPM Tilhill](#)

### PROJECT SPECIFICATION

The National Armed Forces War Memorial was built in recognition of the men and women who gave their lives in the service of their country since the Second World War. This large structure comprises of a 6m high mound of top soil with a spiral path around which shaped evergreen oaks were planted. The made up ground presented a particular challenge for anchoring the trees and a number of site tests were completed to determine the correct choice of tree anchoring system. The final result was to create a harmonious atmosphere in keeping with the war memorial and the surrounding area.

**Tree Anchoring System: RF3P** - Consisting of 3 x S81 anchor assemblies, 1 x ratchet tensioner with 10 metres of 6mm Ø galvanised cable & 3 x Plati-Mat rootball protection mesh.

**Quantity:** 57

**Soil Type:** Made up ground
