

Case Study

HARDMAN SQUARE, SPINNINGFIELD

Client: Allied London

Landscape Architect: Hyland Edgar Driver

Landscape Contractor: [English Landscapes Ltd](#)

PROJECT SPECIFICATION

This prime commercial development located in the city centre of Manchester required landscaping to create a more natural green environment. Eight large 1m girth oak trees were planted into preformed concrete containers, each with their own watering system and drainage channel. The close proximity of the surrounding buildings created a 'wind tunnel' effect which meant that the trees needed to be secured for the first 5 years.

Tree Anchoring System: RF4RTB - 3 x anchor cables with 3 x expanding eyebolts, 1 x two way ratchet tensioner c/w 10m of 6mm Ø galvanised cable.
Plus PM4: 3 x Plat-Mat rootball protection mesh.

Quantity: 8

Design Life: 5 yrs

Soil Type: Prepared Tree Soil
