

# Case Study

## PRIORY PARK RESTORATION, REIGATE, SURREY

**Client:** Reigate & Banstead Borough Council, Surrey County Council  
**Landscape Architect:** Land Use Consultants (LUC)  
**Landscape Contractor:** [UPM Tilhill](#)

### PROJECT SPECIFICATION

Managers of this historic park were faced with the challenge of providing an authentic £7m restoration and meeting the needs of today's park using public. Supported by a Heritage Lottery Fund, the restoration included a large amount of semi-mature tree planting around the sunken garden next the 18th century house, creating an ornamental avenue adjacent to the new playground and reinstatement of tree lined former carriage drive uncovered through archaeological research. The car park was also redesigned and replanted, making it more navigable by pedestrians as well as cars. Reopened in May 2008, this premier park has benefited from a makeover that has combined original 18th century character with 21st century updates.

#### Tree Anchoring System:

**RF1P** - 3 x S41 anchors, 1 x ratchet tensioner with 4m of 3mm galvanised cable & 3 x Plati-Mats.

**RF2P** - 3 x S61 anchors, 1 x ratchet tensioner with 7m of 4mm galvanised cable & 3 x Plati-Mats.

**Quantity:** 250

**Soil Type:** Various across site
